Why did we have to go back to Town Meeting for the school roof projects?

The original roof estimates for Center and Hall Schools, which were provided by a licensed architect who has performed a significant amount of work in collaboration with the Office of School Construction Grants and Review, has increased due to rising costs in materials, additional roof drains required by code, necessary brick repointing, and required deck repairs.

Notes:

- Grant applications cannot be submitted until funding is approved at Town Meeting
- Grant applications take months to prepare and are only open the first 10 days of each month
- Separate grant applications must be submitted for each roofing project
- Grant applications require a 20-year commitment and if any school renovation or new building project occurs after the installation of a grant-funded project, the town would need to repay a portion of the grant
- Construction costs currently range from \$16-\$28 per square foot
